---

To the future employer of Chris Wade.

I have worked with Chris Wade for approximately two years. First as a supervisor, and then as a collaborator on various land and resource management analysis projects. Chris transferred out of my department about a year ago due to budget constraints. I continue to use Chris for advice for computer system maintenance and program software usage.

I find Chris to be very knowledgeable of PC systems management and organization. This office has many stand alone PC's and a PC network, communicating with a wide variety of peripherals. Chris was extremely helpful in initially making all the necessary installation connections, and then assisting in an efficient systems maintenance program. He has shown skill as an instructor, organizing and conducting workshops for many software programs used at this office.

I have found Chris to be a pleasant co-worker; supportive and always willing to lend a helping hand. He has a good sense of humor and seemingly boundless energy that has a positive effect on almost everyone he encounters. I know that Chris is very dedicated to his family, church, and community.

Chris has an uncommon sense of where his value can be best utilized in every work environment I have witnessed him in. He needs opportunities to fulfill career ambitions that will benefit both himself and his employer. I highly recommend Chris for any position that he may be seeking. He is an outstanding employee and person.
